-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. Applicant's prior art citation filed January 07, 2004 has been received, considered and placed of record.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 5-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5 is vague and indefinite because "the squeegee unit further includes a generally T-shaped handle member wherein, the shaft of the handle member is connected to the shaft of the spray wand member and the cross arm of the handle member is connected to the cross arm of the spray wand member" renders the claim unclear. This feature is not clearly described in the Specification. See claim 7 for the same informality.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3752

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-8, as best understood, are rejected under 35 U.S.C. 102(e) as being anticipated by Porter (U.S. Patent No. 6,553,941).

As per claim 1, Porter teaches a spray cleaning apparatus comprising a primary spray unit (10) including a generally T-shaped spray wand member (16) including a hollow shaft having one end connected to a primary spray gun (14) member with a trigger (20) and wherein, the other end of the hollow shaft terminates in a cross arm (24) provided with a plurality of downward angled spray nozzles (64); and a squeegee unit (26) including an elongated wiper blade member that is operatively connected to the cross arm of the spray wand member (see Fig. 2).

As per claims 2-4, the apparatus includes a primary spray gun member further provided with a branch fluid coupling (18) adapted to be connected to both a high pressure hose as well as the elongated length of hose (12) that is connected to the single nozzle spray gun member (22) (see Fig. 1).

As per claims 5-8, the wiper blade is fixedly connected to the cross arm of the handle member (24).

Art Unit: 3752

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Robinson, Vito, Jiang, Shero and Skenderi are cited of general interest.
